

SEFINA INDUSTRIES LTD.
ARCHITECTURAL MILLWORK

Nurturing Our Reputation

Sefina Industries, Ltd. specializes in the supply of high end, custom fabricated millwork for the international market.

Over the course of three generations, we have constantly strengthened and renewed our commitment to quality. Our production facilities therefore represent a harmonious balance between old world cabinetry making skills and the most cutting edge machinery and software.

In our interactions with clients, consultants and other trades, we bring to the project a team approach focused on problem solving. Letters from our past and current clients, address not only the quality of our product, but also, in equal measure, the quality of their relationship with us.

We are proud of the reputation we have established on these twin pillars of product and relationship, and every new project gives us another opportunity to nurture this reputation.

Ritz Carlton St. Moritz

New York City, New York

Millennium Partners Development

We were greatly impressed by Sefina's ability to provide a product of outstanding quality, while coping with schedule and site issues which were extremely challenging.

Sefina has a particularly strong engineering department which has repeatedly proven itself invaluable in coordination, establishing layouts and all around problem solving.

This company is family owned, and the principles are directly involved in the operations. I have the highest personal regard for them, as they have always shown themselves to be individuals of integrity in their business dealings

David S. Rothstein

“I want to thank you for your personal cooperation and assistance regarding our project in Berlin. It is comforting to know that one can truly rely on an organization such as yours to bring quality, dependability and professionalism to the development process. I hope that Sefina will continue to be a member of our development team in the future.”

Circus Circus Development

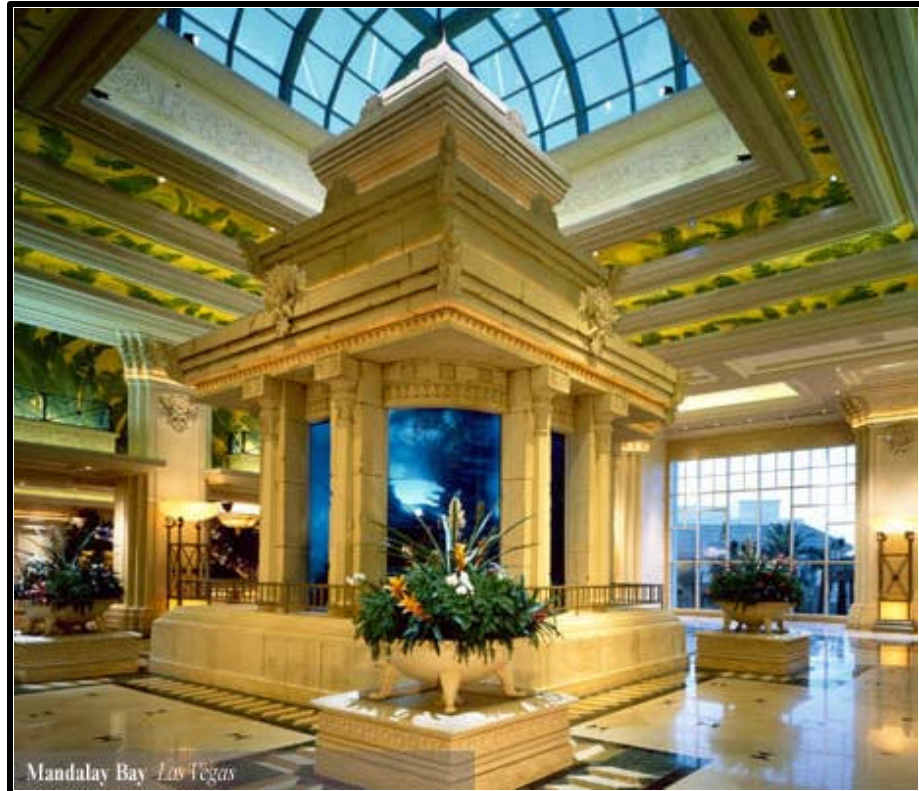

“This is a family concern, with an international reputation for the highest levels of quality in architectural millwork. They have brought to our projects a team which is not only professional in its approach, but sincerely devoted to the successful outcome.

I am personally acquainted with the principals and can assure you that behind their large factory there is a heart and soul committed to the success of your project.”

“Of all the trades on the job, your team’s performance was of the highest caliber.

Not in my thirty years in this industry have I seen a more masterful and exemplary performance than I witnessed from your employees.”

**New Jersey Performing
Arts Center**
New Jersey

“The millwork throughout the Center is NJPAC’s single most remarked on feature. It has given the hall its unique character, its identity. Performers and patrons alike consistently remark about the striking beauty of the hall.

You are to be commended for the incredible job your company did here in this regard. The workmanship and the attention to detail demonstrated in the millwork will stand for centuries as testament to Sefina’s commitment to excellence.”

I.M. Pei Design

“The dedication of all the people who worked on the project was of a caliber seldom seen in the industry.

From the time that the project started, right through to the end, I was not only impressed with the high quality of the work that was provided, but also the way in which each of the people at every level responded with a Can-Do attitude, which made the overall experience a true pleasure.”
